Good News

- **Housing is a Top 3 Issue**
- **Decrease in the repair needs of households in poverty** – households in poverty with at least one repair need decreased from 42.4% in 2017 to 40.1% in 2021
- **Newfound bipartisan support** to help homeowners and preserve privately owned affordable housing - Aging homes blamed, not homeowners
- **New players:** Healthcare, code enforcement, climate resilience, estate planning
- **Significant policy and academic interest**
- **Programs collaborating and getting to scale**

1 in 4 Pennsylvania Voters Need Critical Repairs to Their Place of Residence

Does your current place of residence need a critical repair? This could include fixing issues such as a leaky roof, plumbing issues, water damage, faulty or outdated wiring, broken heater or air conditioning system, non-working windows or doors, or accessibility needs for people with disabilities.

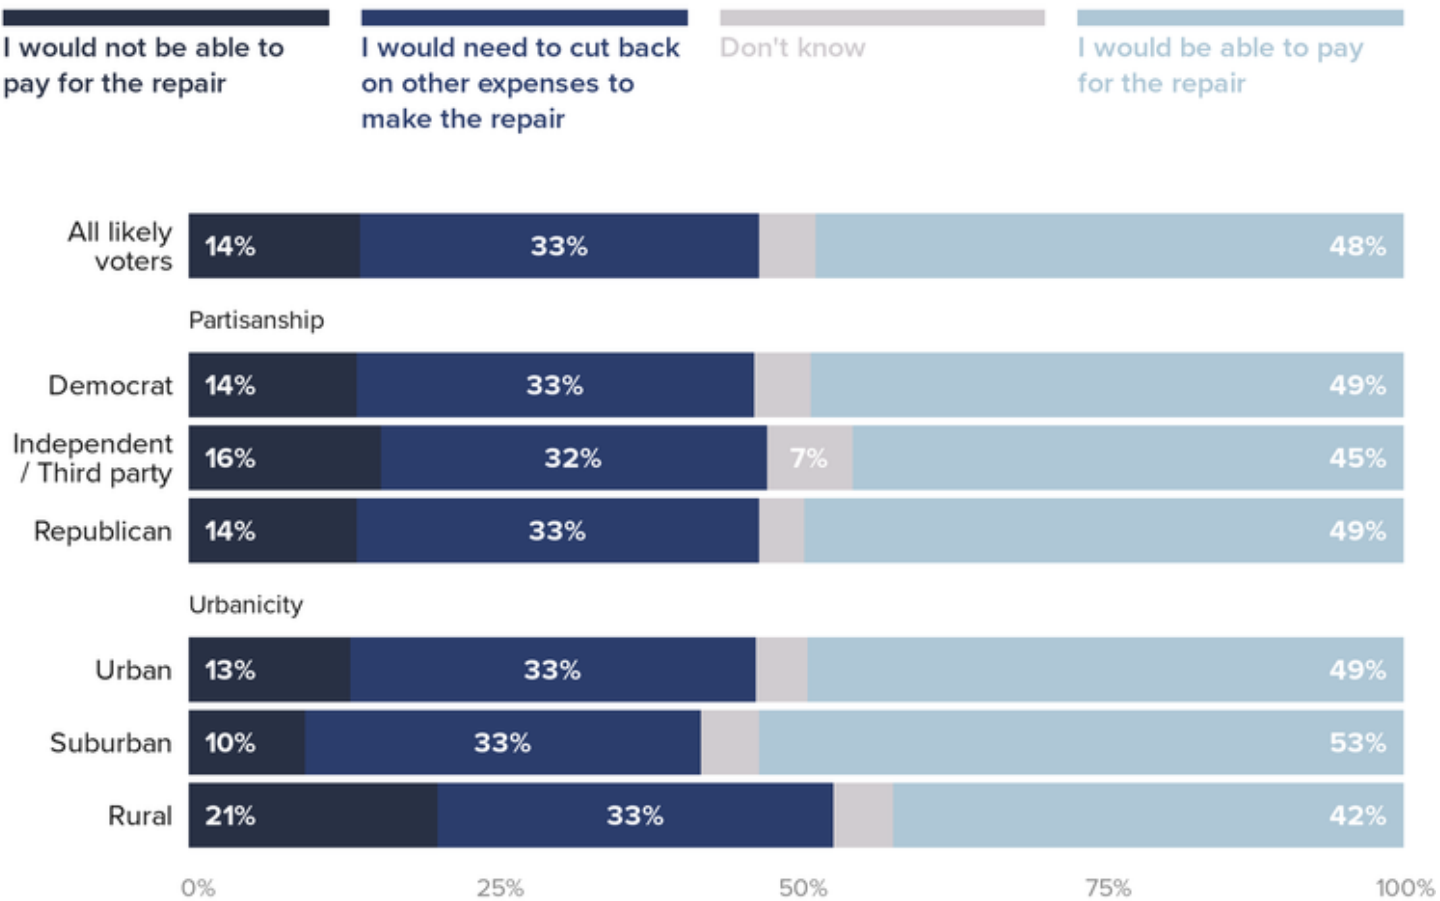

May 5 - 17, 2022 survey of 745 likely PA voters

DATA FOR PROGRESS

Nearly Half of Pennsylvania Voters Who Are Homeowners Would Struggle to Pay for a Critical Repair

Suppose you have a critical home repair expense. Which of the following describes your ability to make the needed repair?

May 5 - 17, 2022 survey of 478 likely PA voters

Not So Good News

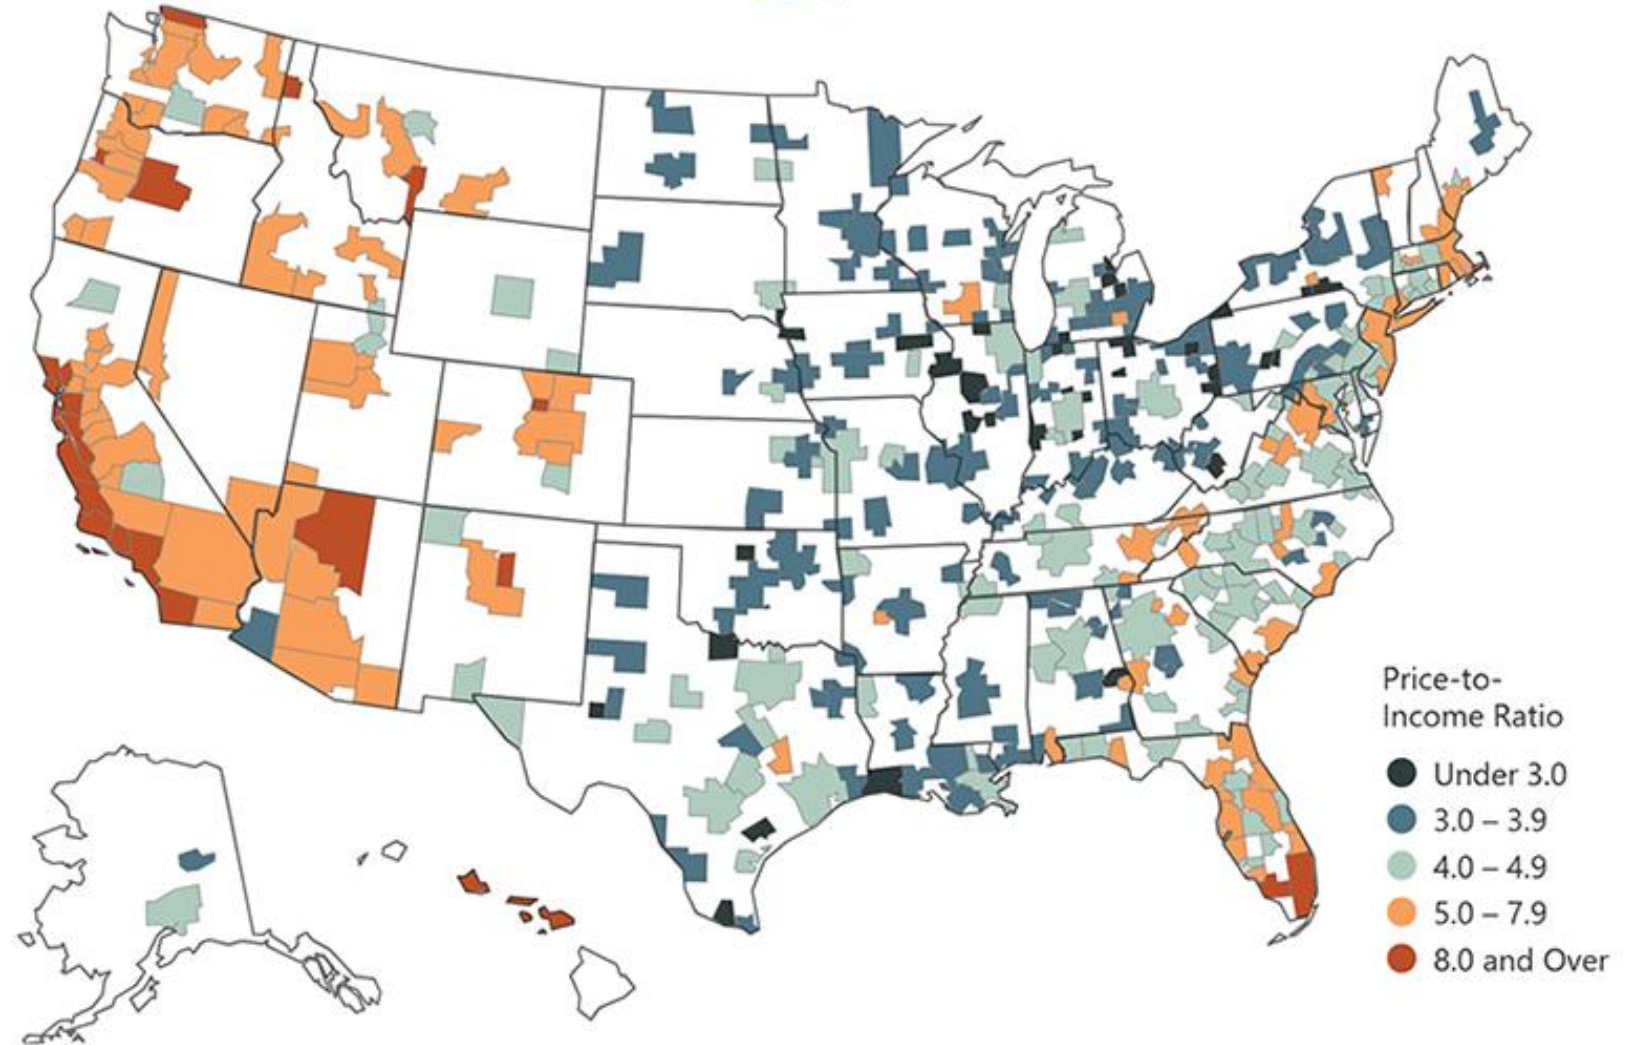

- Housing shortage comparable to after WWII
- Federal funding uncertain
- Cost of materials and labor rising
- Risk of displacement and wealth loss for low-income owners high
- Once investors buy homes for rental, not coming back to homeownership
- Many owners can't tap into equity to obtain home improvement loans

Critical Moment to Preserve Low/Mod Homeownership

2024

National Median
Single-Family
Home Price = 5X
Median Income

MAY 8 CONSULTING

Homeownership is Out of Reach for up to 75% of Residents

- Median existing home price hit \$412,500 with monthly mortgage payment of \$2,560
- Median age for first time buyers up to 38 years
- Houston – only 28 out of 286 occupations could afford to buy a home with 10% down in 2024.
- 125 Metros, a buyer needs double the income they needed 5 years ago - \$71K in 2019 to \$144K in 2024
- Seattle – Dentists can't buy a typically priced home

Existing Homeowners Face Rising Costs

- Average electricity rate is 40% higher now than in 2019
- Homeowner's insurance premiums up 53% since 2019 from \$209 to \$320
- 2020 – 2024: Repair cost increases
 - HVAC repairs -\$7,500 to \$12,500
 - Electrical panel tripled from \$1,500 to \$4,500
 - Shower installs up 50%

Aging in Place Has Become a Difficult Necessity

- Seniors over age 55 are the fastest growing unhoused age group – 1 in 5 homeless persons
- By 2038 an additional 4 million older adults with low incomes will be unhoused
- Only 4% of homes are accessible

Homeowners in Low/Mod Neighborhoods Have Limited Access to Home Equity for Loans

Mecklenburg County Home Improvement Loan Denials by Income, 2010-2023

County: Mecklenburg County, North Carolina

Homeowners Need Repair Help and Research Shows Its Power

Huge Impact of Home Repairs Proven by Research

	Improve health		Preserve the city's iconic housing stock	
		Create neighborhood jobs	Allow seniors to age in place	Become a more resilient city
	Revitalize neighborhoods	Slow the decline of home ownership		Stop abandonment
		Improve school performance	Lower healthcare costs	Prevent displacement

Philadelphia Home Repair Program Associated with Lower Crime

City program funded electrical, plumbing, heating, and roofing repairs

Structural repairs to homes in low-income, predominantly Black neighborhoods were associated with:

22%
decrease in
overall crime

23%
fewer
robberies

22%
fewer
homicides

19%
fewer
assaults

Why Is a Robust Home Repair Ecosystem Needed?

Service providers working in silos, duplicating administrative costs

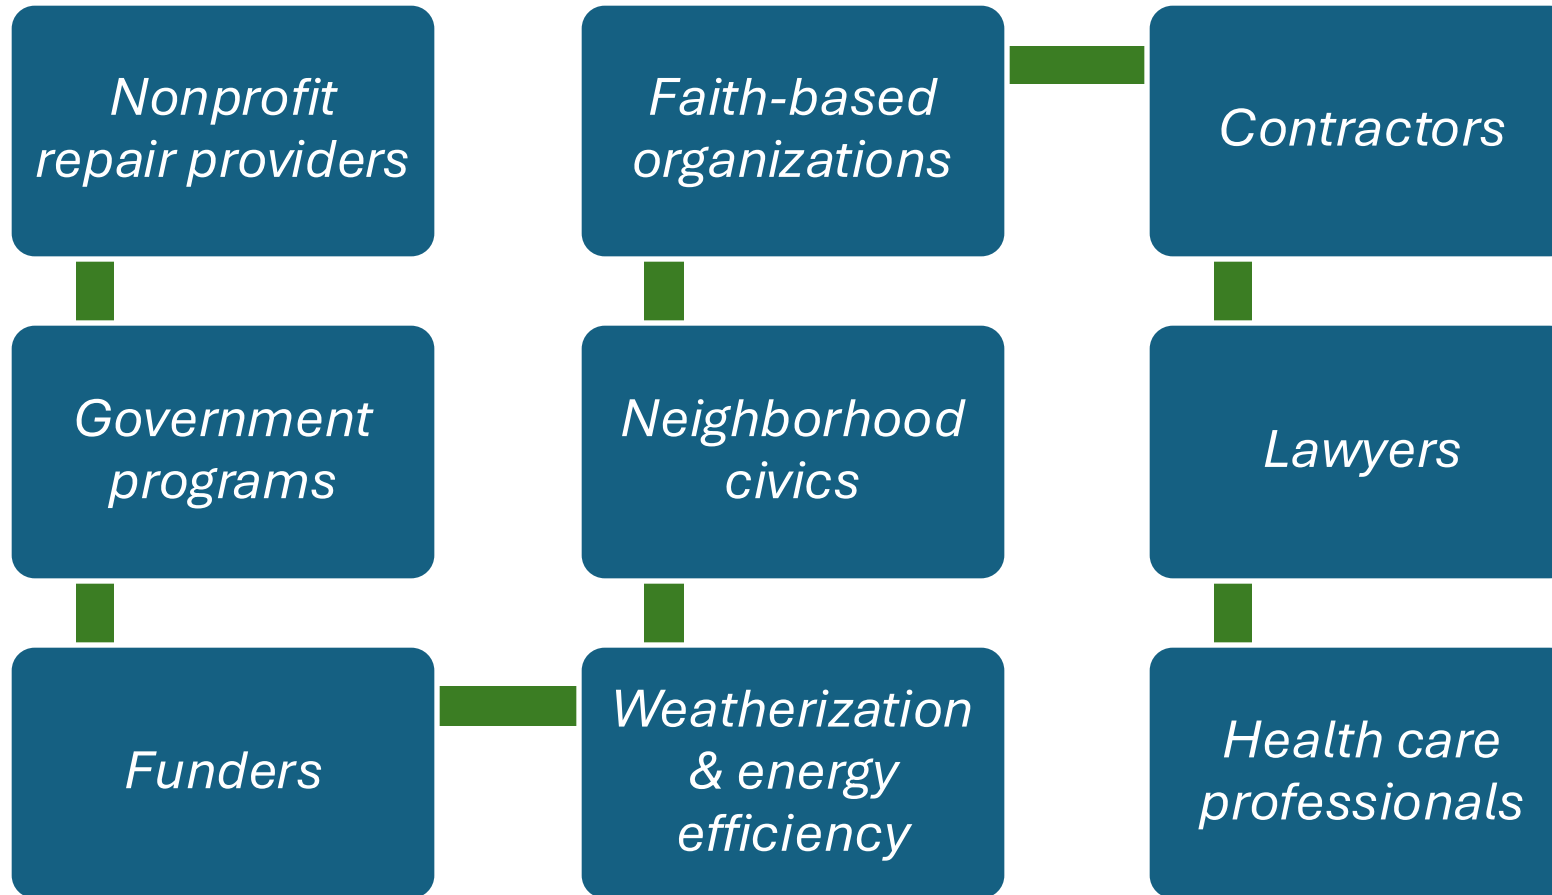

Homeowners struggle to navigate multiple programs with different eligibility requirements

Service gaps that disconnected programs can not identify and fill

No shared data that provides a unified picture of community wide challenges and tracks progress toward achieving shared goals

Insufficient funding and limited proof of need or impact

Who Is Part of a Robust, Effective and Equitable Home Repair Ecosystem

What Makes a Robust, Effective and Equitable Home Repair Ecosystem

High functioning collaborative programs

Minimal program overlap

Shared data

Coordinated intake

Skilled contractors

Expansive and diverse funding

Evaluation process

Homeowner education

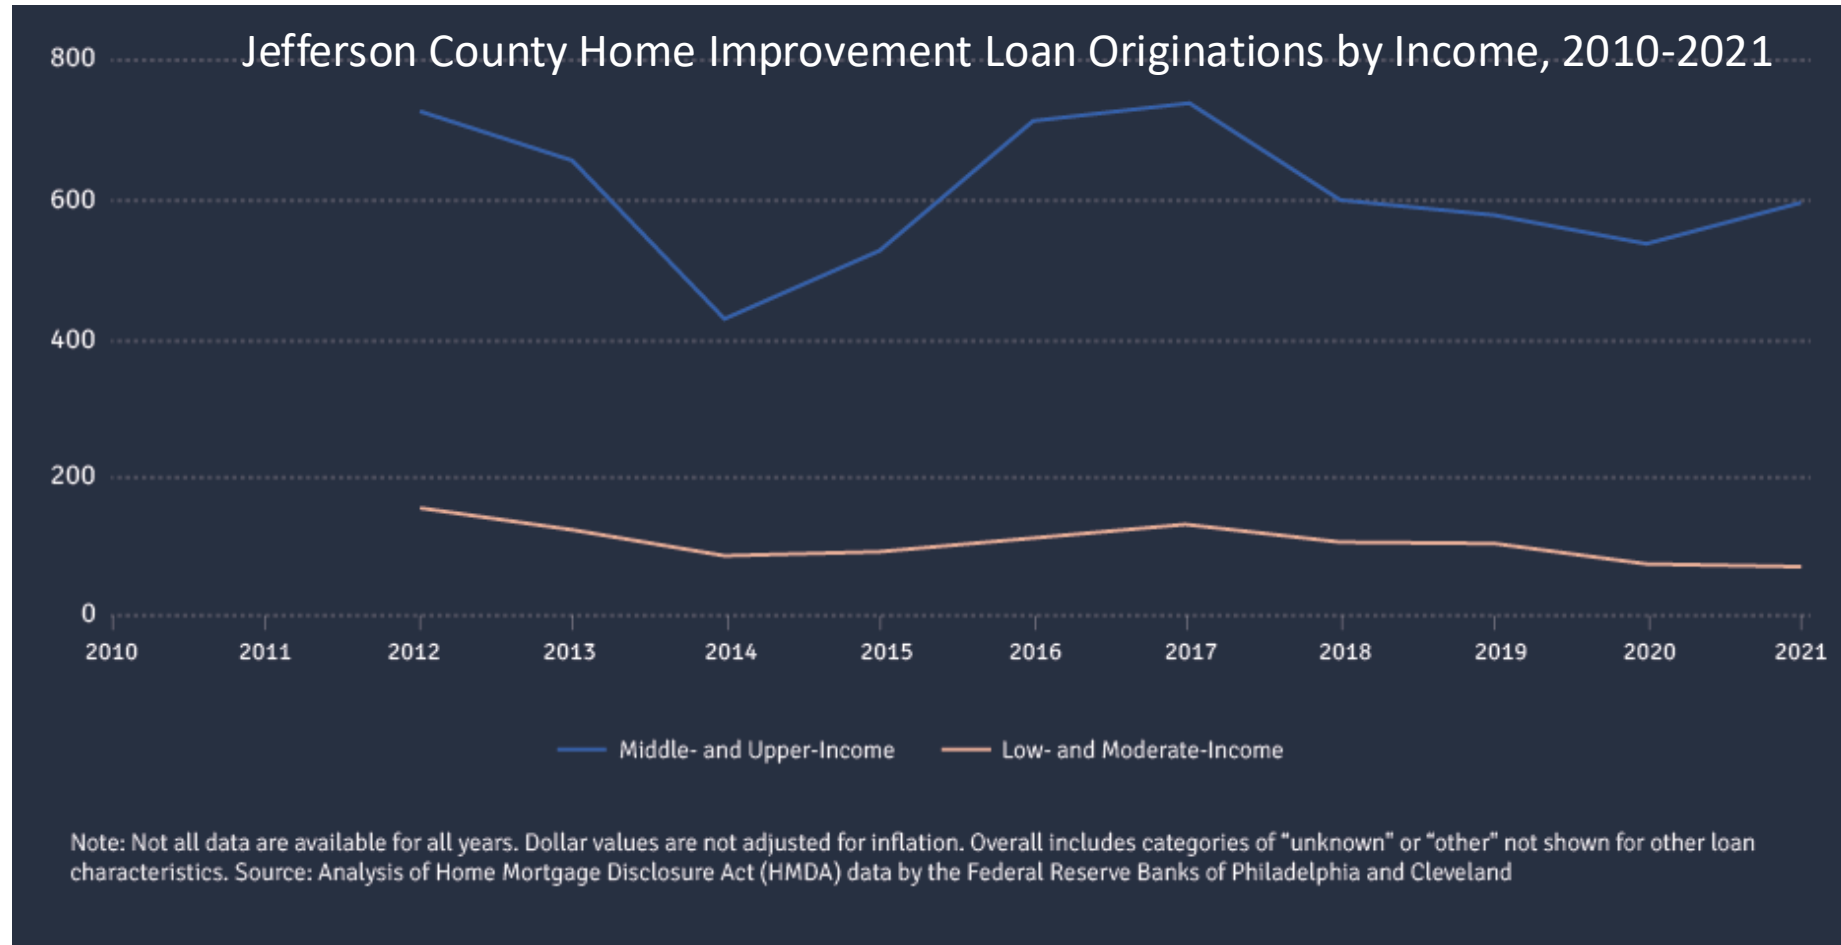

Reason for Needs Assessment

As homes and their owners age, unchecked deterioration is threatening the viability of low-income homeownership, the physical integrity of affordable housing, and the safety and health of those who live there.

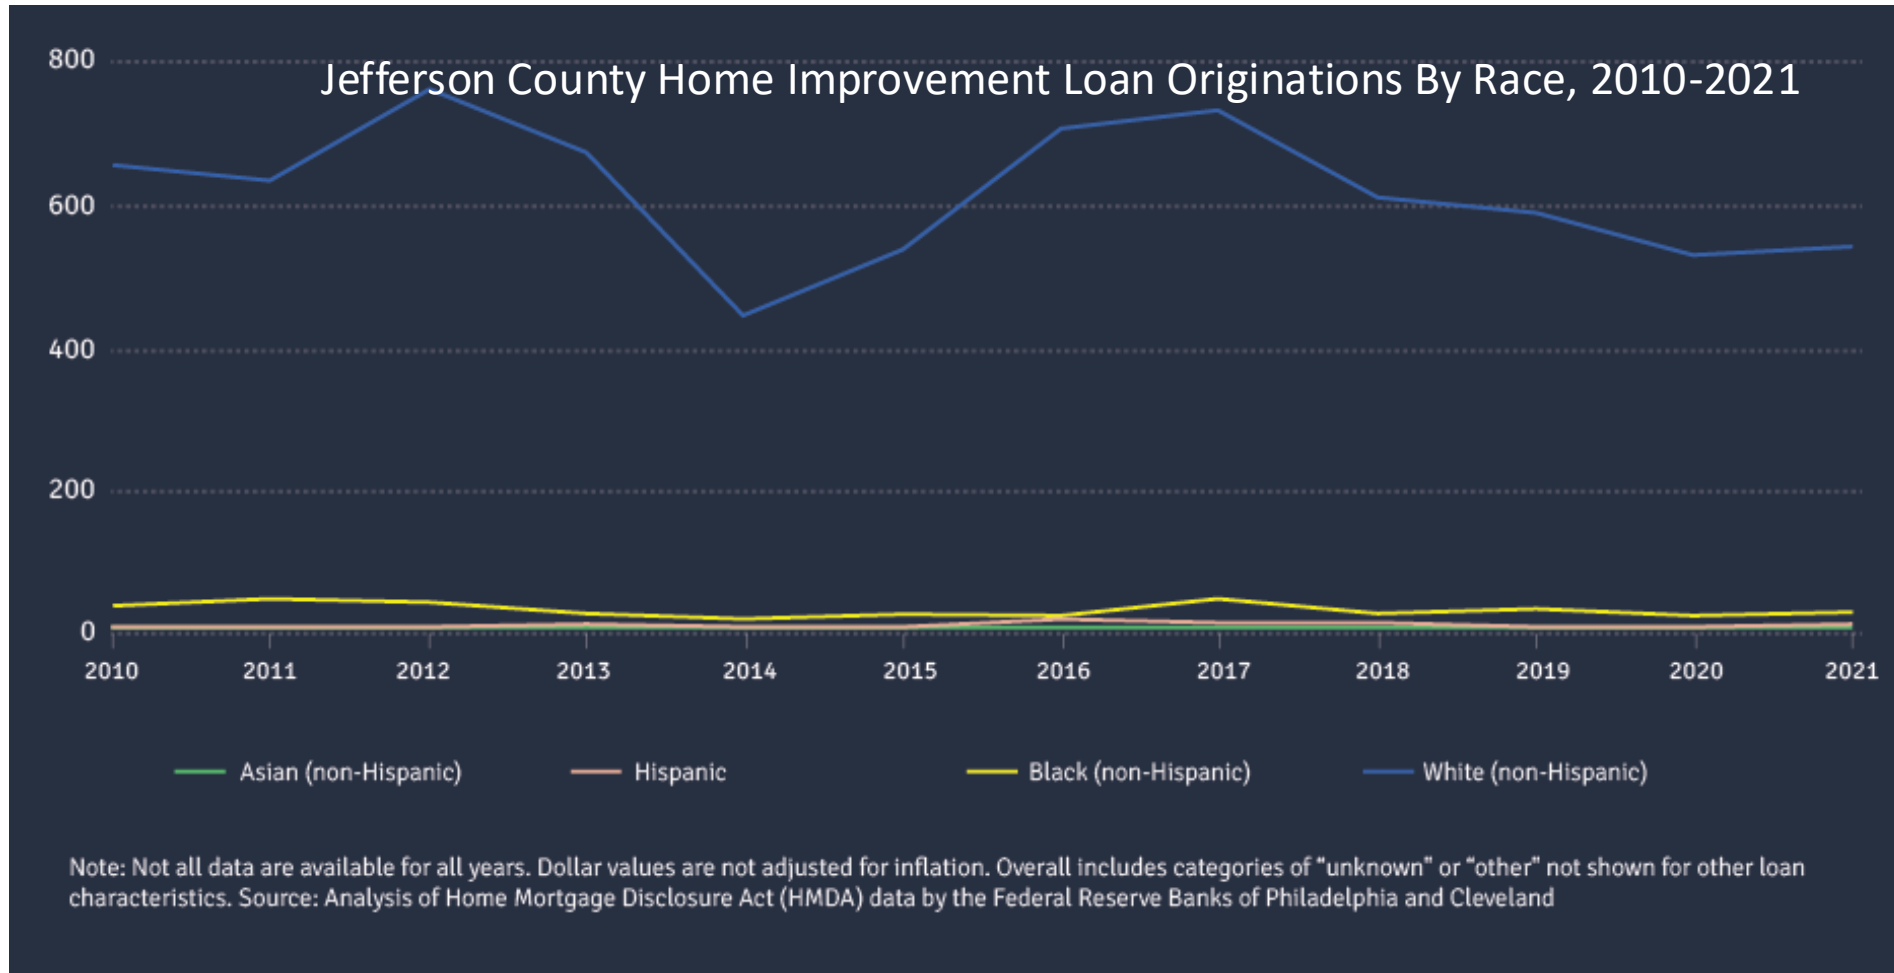

18,719 homes built before 1960 were lost from Louisville's housing supply between 2000 and 2023.

Limited Access to Home Improvement Loans

Limited Access to Home Improvement Loans

Goals for Needs Assessment

Provide a detailed analysis of who is currently being served with home repair assistance

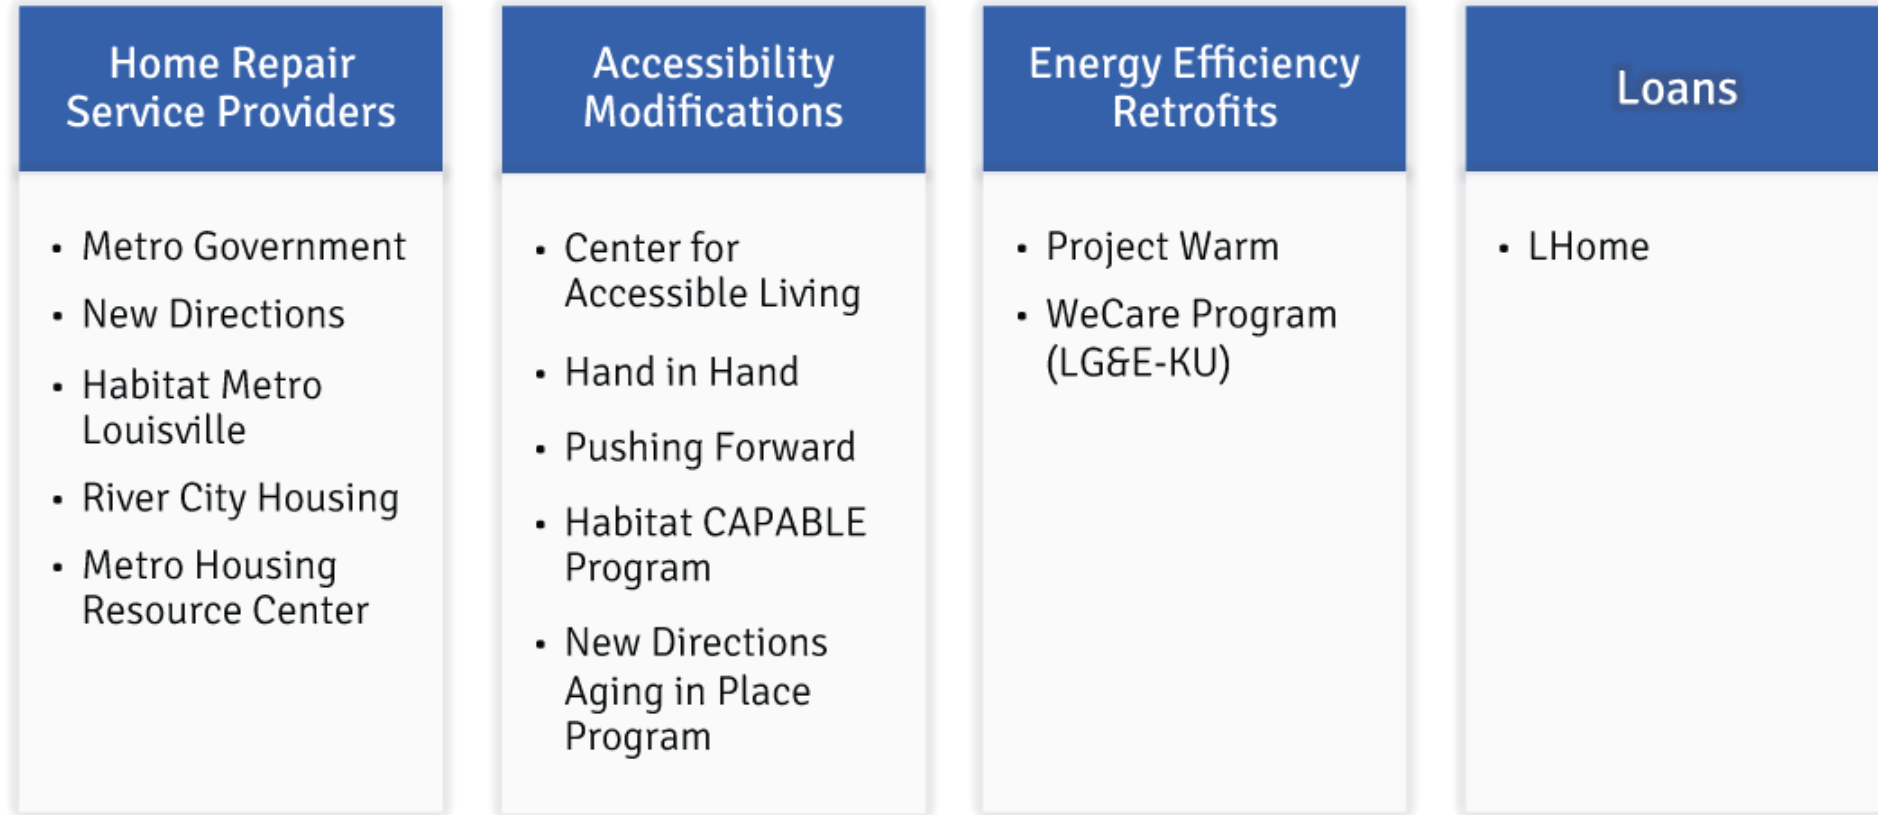

Estimate the level of unmet demand

Present nine findings and recommendations to help build a more resilient, effective, and equitable home repair ecosystem.

Louisville Metro's Home Repair Ecosystem

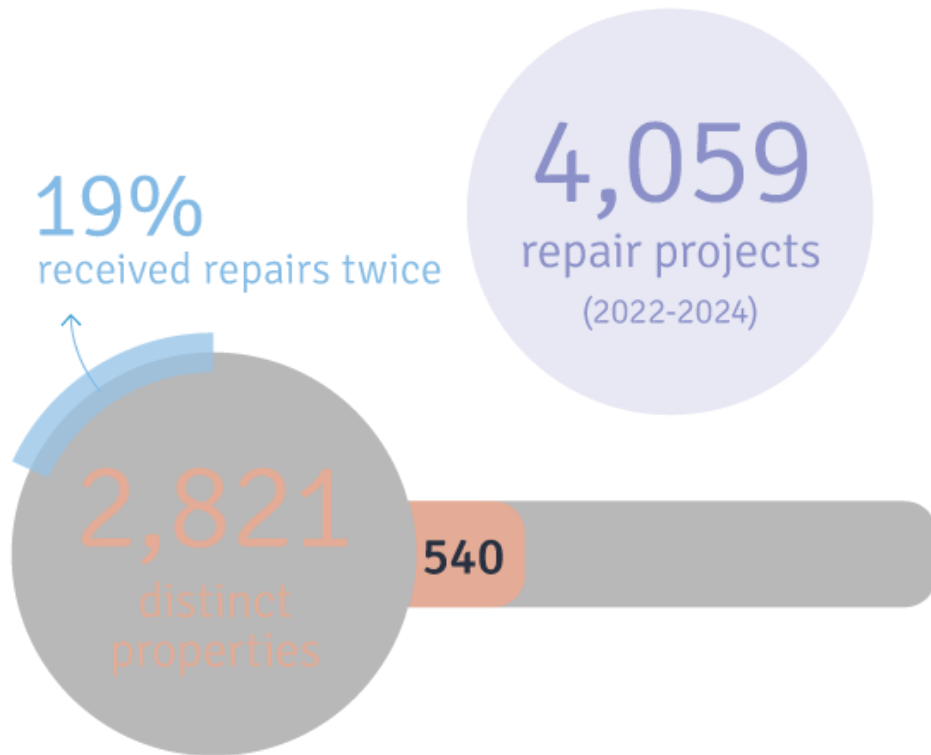

Who needs repairs and how many are receiving services?

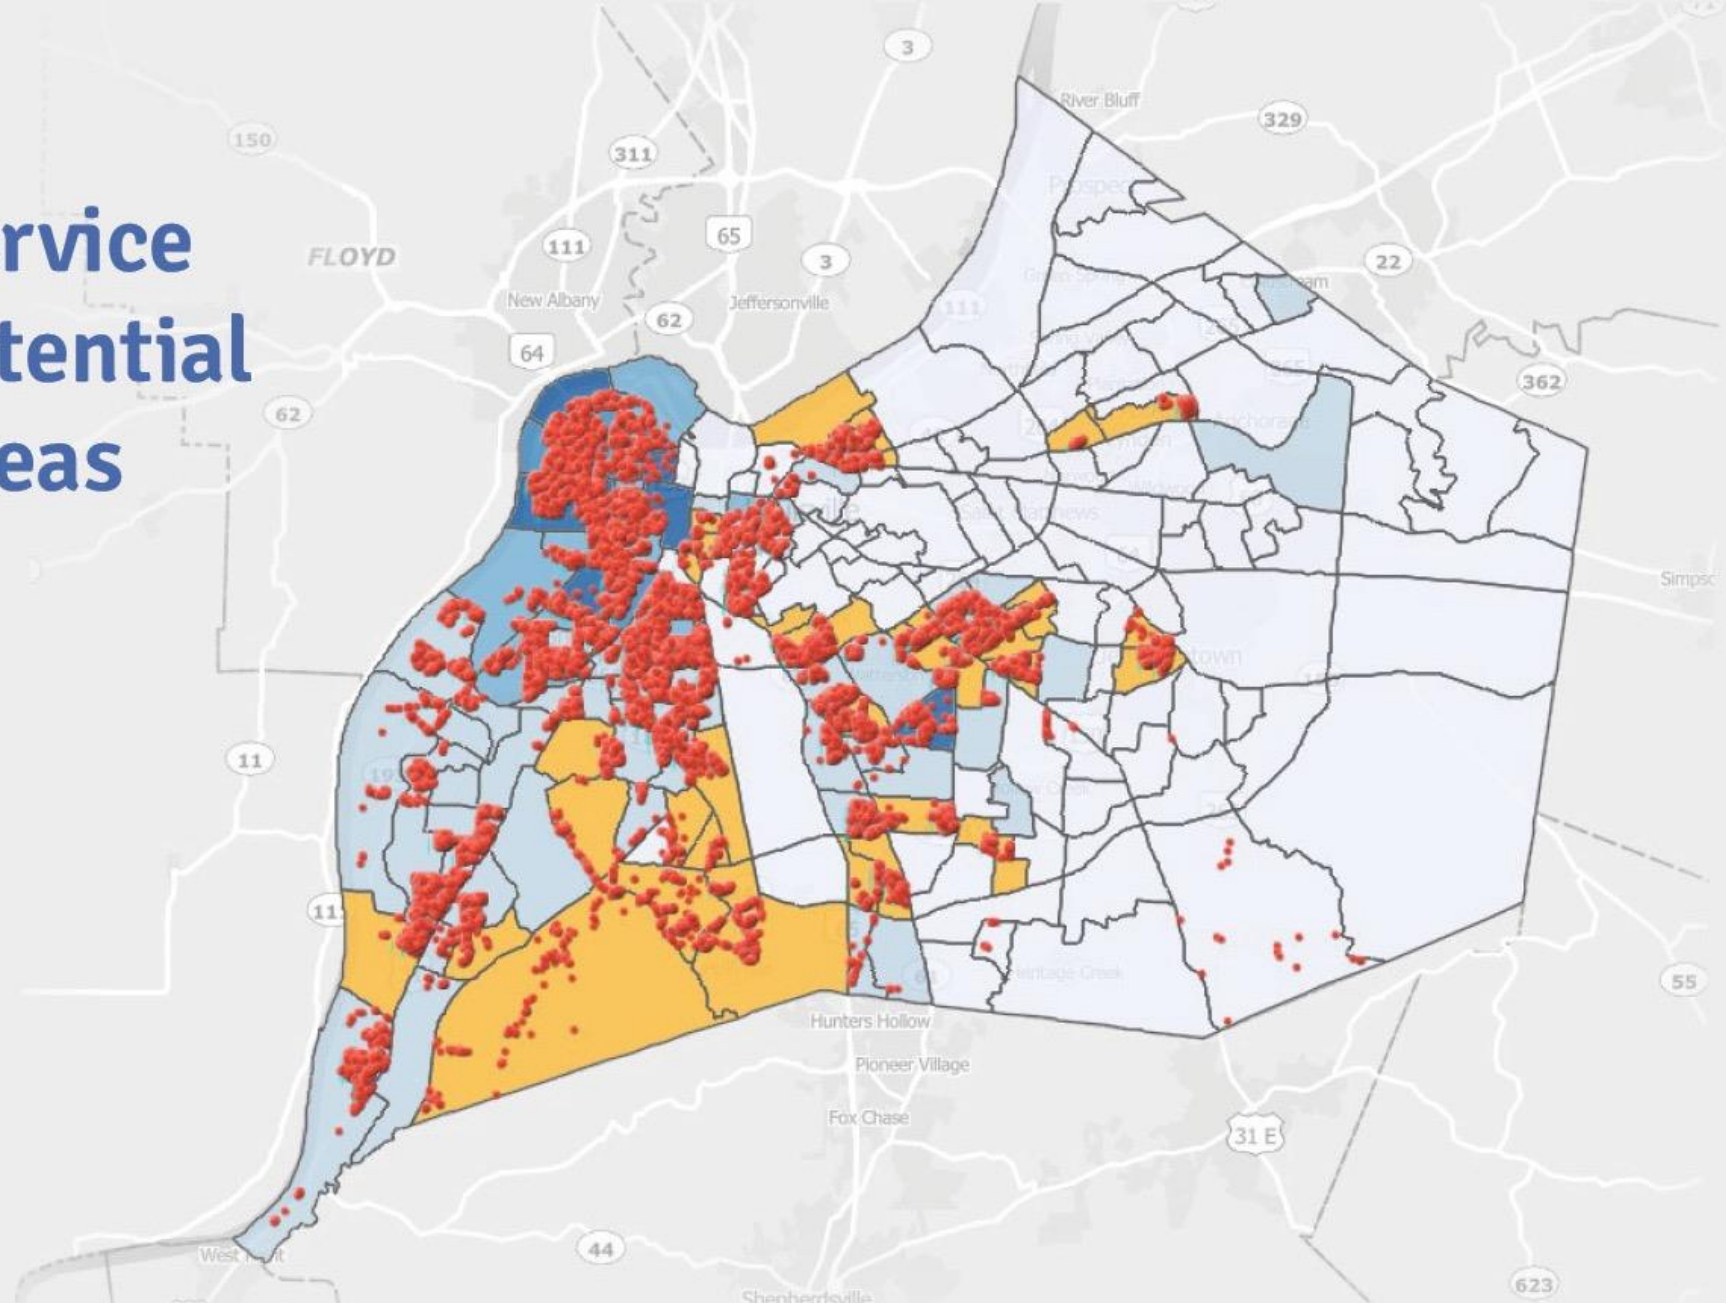

- An estimated **29,000 low-income homeowners**—many of them seniors—need critical home repairs to remain safe, stable and housed.
- Louisville’s home repair programs currently **reach just over 1,000** low-income homeowners a year.
- At this pace, it would take **nearly 30 years** to serve everyone in need, which doesn’t include additional families that will inevitably face repair challenges as their homes age.

Households and Properties Being Served

Home Repair Service Delivery and Potential Underserved Areas

What are the key features of the existing home repair ecosystem?

Siloed service delivery by each provider

Serves senior and disabled homeowners

Assists on first-come, first-serve basis with long wait times

Requires homeowners to navigate a patchwork of programs with differing eligibility requirements

Includes critical service gaps (e.g. emergency home repair program)

Lacks shared data

Repair maximums often inadequate to meet needs

Findings & Recommendations

9 practical actions
to increase the
scale and quality of
home repair
assistance within
3 action areas.

Action Area 1

Coordinate Better, Fund Stronger

Build coordination within the ecosystem of providers and engage new partners for increased impact and investment.

Action Area 2

Design Smarter, Deliver Impact

Align programs with community needs for better results.

Action Area 3

Measure What Matters, Adapt Quickly

Develop tools for data analysis and evaluation to improve service delivery.

Action Area 1

Coordinate Better, Fund Stronger

Build coordination within the ecosystem of providers and engage new partners for increased impact and investment.

1. Strengthen and Expand Home Repair Ecosystem

- Create coordinated network of providers to increase capacity
- Enlist allies and partners (e.g. faith-based and civic organizations, health care providers and lawyers, energy efficiency programs)
- Lower costs, fill gaps in service, create educational resources for owners and advocate for better policies

2. Shift Metro Government's Role

- Move from direct service delivery to funding and coordinating efforts
- Strengthen and expand community-based providers who do not have the same barriers to efficient service delivery
- Metro Government should continue to manage programs that require interdepartmental coordination (e.g., ECAP and Lead)

3. Expand Funding to Better Meet Need

- Need a broader funding strategy from philanthropic, public and private sources
 - Foundation grants
 - General obligation bonds
 - Operating budget
 - Tax incentives

Action Area 2

Design Smarter, Deliver Impact

Align programs with
community needs for
better results.

4. Launch an Emergency Repair Program for Acute Housing Safety Issues

- Address urgent threats to a family's health, safety or continued occupancy of their home such as no heat in winter or a severe roof leak that is causing interior damage.
- Can respond within days, fix the one urgent issue at relatively low cost and reduce long-term damage to the home.

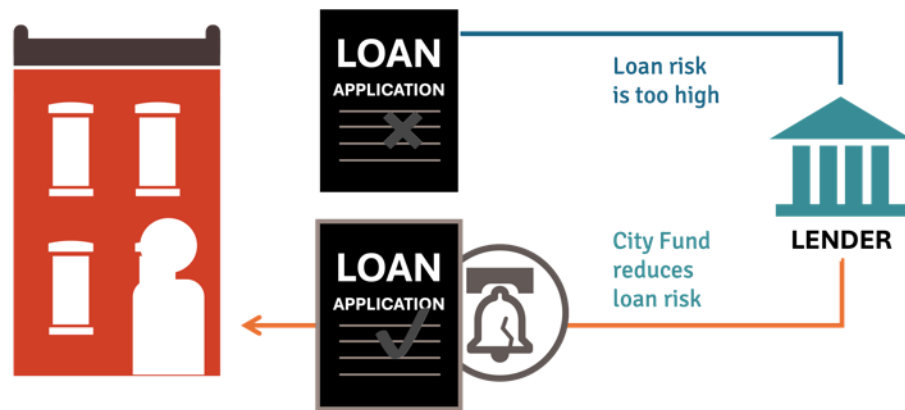

5. Create a Shared Intake Model

Creating one place where any homeowner can apply digitally and by phone will:

- Prevent owners from having to file multiple applications or get on “referral merry go round”
- Prevent owners from unintentionally receiving repairs twice when others do not receive
- Track data about applicants, denials and repairs provided more effectively

6. Increase Access to Home Improvement Loans for Moderate Income Homeowners

- Convene a lender roundtable
- Establish a credit enhancement mechanism to reduce risk to private market lenders so they are more willing to provide small loans to homeowners OR
- Create a home repair loan fund anchored by a community lender (CDFI) to provide low interest home improvement loans to homeowners

7. Explore New Tools to Improve Housing Conditions within Rental Properties While Preserving Affordability

- Rental units are even more likely to need repair
- Explore whether Mom & Pop landlords will accept low interest loan in return for not raising rents for loan term

Action Area 3

Measure What Matters, Adapt Quickly

Develop tools for data analysis and evaluation to improve service delivery.

8. Track and Analyze Data to Understand Who Is Being Served and Who Is Not

- Collect data to give providers, funders and the public:
 - comprehensive view of applicants,
 - services delivered by each different program,
 - timeframe in which those services were provided, and
 - referral outcomes.
- Data will help guide evidence-based improvements so more homeowners are served better
- If you don't measure it, you can't improve it

9. Create an Evaluation Process to Understand and Improve Service Delivery Outcomes

- Need a consistent process to analyze key data and gather feedback from customers and contractors to improve service delivery and better serve the estimated 29,000 households who need repair help

The most affordable home is the one a family is living in now.

Your community can build a durable, high-performing home repair ecosystem — one that keeps its homes safe, its neighborhoods strong, and its residents housed.
